Professional Summary

Computer Science and Engineering student with a CGPA of 8.3/10, focused on Cloud Computing, Enterprise Data Management (EDM), DevOps, and AI. AWS Certified AI Practitioner with hands-on experience in OpenMetadata, Selenium automation testing, Python, and AI-powered application development. Passionate about enterprise data management, cloud technologies, automation, and modern data workflows.

Education

SSM Institute of Engineering and Technology

Bachelor of Engineering (Computer Science and Engineering)

Sep 2023 – May 2027

CGPA: 8.3/10

Technical Skills

- **Programming Languages:** Python, C (Basics)
- **Cloud Platform:** Amazon Web Services (AWS) – Basics
- **Enterprise Data Management:** OpenMetadata, Metadata Management, Data Lineage, Data Governance
- **Testing Tools:** Selenium WebDriver
- **DevOps & CI/CD:** Docker (Basics), Git, GitHub
- **AI/ML Tools:** Claude API, OAuth, ReportLab
- **Operating Systems:** Linux (Basics)

Projects

PrepAI – AI-Powered Student Study Assistant (In Development)

Python, Flask, Claude API, ReportLab, GitHub Actions

- Developing an AI-powered academic assistant that generates examination-oriented answers based on selected subjects and question formats.
- Integrating Claude AI to create structured and context-aware responses from user inputs.
- Implementing PDF generation functionality using ReportLab for downloadable study materials.
- Managing source code using Git and GitHub while planning automated deployment workflows with GitHub Actions.

Personal Portfolio Website

HTML, CSS, JavaScript, GitHub Pages

- Designed and developed a responsive portfolio website to showcase projects, certifications, and technical skills.
- Built interactive and user-friendly web pages using HTML, CSS, and JavaScript.
- Managed version control using Git and GitHub.
- Deployed and maintained the website using GitHub Pages.

Experience

Dhanam Cloud Computing Internship

Enterprise Data Management (EDM) & AI Intern

3 Months

- Worked on Enterprise Data Management (EDM) and AI concepts in a cloud computing environment.
- Gained hands-on experience with OpenMetadata for metadata management, data discovery, data lineage, and data governance.
- Explored metadata ingestion, data profiling, and enterprise data management workflows using OpenMetadata.
- Performed automation testing using Selenium WebDriver by creating and executing test cases to validate application functionality.
- Collaborated with team members to document workflows, analyze metadata, and support enterprise data management solutions.

Infosys Springboard – Python Virtual Internship

Python Intern

Jun 2026 – Aug 2026 (Ongoing)

- Learning Python programming concepts including Object-Oriented Programming (OOP), file handling, and automation scripting.
- Completing hands-on assignments and practical exercises to strengthen problem-solving and coding skills.
- Developing Python-based solutions through structured learning modules and assessments.
- Exploring the application of Python in cloud computing, automation, and DevOps workflows.

Certifications

AWS Certified AI Practitioner

Amazon Web Services – 2026

Foundational knowledge of AWS AI/ML services, cloud-based deployment, and responsible AI practices.

AWS Certified Cloud Practitioner (In Preparation)

Scheduled – July 31, 2026

Core AWS services, pricing models, IAM, VPC, cloud architecture fundamentals, and security best practices.
